Information Station Specialists

Amateur Radio Operators in all 50 states rely on Information Station Specialists (www.theRADIOsource.com) for the equipment and services to broadcast emergency information to vehicle radios in their communities over AM channels 530-1710 kHz. Offerings now include a 630 meter Ham radio antenna as well.

The Hamvention Information Station: Tune to AM 1620 as you approach Hamvention to hear a live demonstration of Information Radio technology, including daily weather, parking, travel, and traffic information, interviews, and the daily schedule, updated minute-to-minute. The "Hamvention Radio 1620" radio signal will be broadcast this year with the new AN2X high efficiency/ vertical antenna and groundplane that will be displayed in the yard area just west of Building 1.

New 630 Meter Antenna: In 2023, Information Station Specialists will be displaying the new "Lowdown" 630 meter antenna in booth 1002 in Building 1. You can read about recent 630 meter testing on [this webpage](#).

Read More: Interested in learning more about "Information Radio"? Check out [The Source newsletter](#). You can read the most recent issue and sign up to receive it regularly. Information Station Specialists offers portable and fixed AM radio systems purchased by city/county emergency managers and other public safety officials. Services include FCC licensing, installation, and training. For more information, email [Bill Baker](#).

CIRO MAZZONI LOOP ANTENNA by I3VHF

3009

Confirmed

Ciro Mazzoni I3VHF

The CIRO MAZZONI LOOP ANTENNA was designed and handmade with pride in Italy by Ciro I3VHF, who dedicated his professional life to experimentation and testing in order to produce an antenna for hams who have limited space for their aerials, yet still want a quality antenna.

The CIRO MAZZONI LOOP ANTENNA has small dimension but high efficiency. Due to its narrow bandwidth, noise is practically zero and can operate from almost any place. No noise, no limits!
