<b>CW Operator`s Club</b>	5102	Confirmed	Don Greenbaum
<b>Cable Experts</b>	1701-1702	Confirmed	Michael Genzel
<b>Carlson Communications</b>	<b>1205</b>	<b>Confirmed</b>	<b>James Carlson</b>
<p><b>Roof Towers</b> are back in production. Thanks for good graciousness of Roger Cox, Carlson is now producing a wide range of roof towers for your antenna needs.</p> <p>Roof towers indeed offer a practical solution for amateur radio enthusiasts facing restrictions from homeowners' association (HOA) codes or limited lot space. Their versatility in supporting various types of antennas, including fixed, single-axis, or twin-axis rotators, makes them a valuable option for optimizing radio frequency coverage. From 20 meters to centimeter frequencies, the range of antennas compatible with roof towers is diverse, catering to different needs and preferences within the amateur radio community.</p> <p>Popular antenna options like Hex Beams and Low Earth Orbit (LEO) satellite antennas are well-suited for installation on roof towers, enhancing communication capabilities for operators despite space constraints or regulatory limitations.</p>

<b>CIRO MAZZONI LOOP ANTENNA by I3VHF</b>	<b>3009</b>	<b>Confirmed</b>	<b>Ciro Mazzoni I3VHF</b>
---	-------------	------------------	---------------------------

The CIRO MAZZONI LOOP ANTENNA was designed and handmade with pride in Italy by **Ciro I3VHF**, who dedicated his professional life to experimentation and testing in order to produce an antenna for hams who have limited space for their aerials, yet still want a quality antenna.

The CIRO MAZZONI LOOP ANTENNA has small dimension but high efficiency. Due to its narrow bandwidth, noise is practically zero and can operate from almost any place. No noise, no limits!

<b>M2 Antenna Systems, Inc.</b>	3302	Confirmed	Robert Brown
<b>MARCO-Medical Amateur Radio Council</b>	4008	Confirmed	Jay Garlitz
